Subject: Meeting Dec 3

Harry- I'd like to confirm Lockheed Martin's meeting with EPA Dec 3. How about a 10:00 to noon session and then a 1:00 pm to 4:30 session at EPA's Seattle office? Please send me an e-mail confirmation for these times.

Per our discussion, I understand that the agenda would be:

- September gas sampling results, with emphasis on relationship between treatment activities and gas generation/quality
- Potential additional field studies
- Potential additional lab studies
- Regulatory issues related to treatment

Please suggest any necessary additions or modifications to this agenda.

Our attendees will likely be me, Brad Owens, Gene Matsushita, Doug Goins, and two CDM people (Mike Smith and Roger Olsen). Roger is a PhD geochemist with expertise in landfills, cyanide, etc, while Mike is a geologist/hydrologist with extensive background knowledge of The Dalles.

Please consider whether we should have an Oregon DEQ rep present. I believe the RCRA landfill closure/post closure was always state RCRA lead (i.e., not part of the CERCLA Record of Decision or Consent Decree), so the cancellation of the MOU shouldn't affect the RCRA permit status of this landfill.
